RealTimePOS app for decision making

Realtime POS:

A tablet application for retail point of sale system using multi location and multi warehouse management, sales management with multiple sales person, hold sales, multiple payment options

The screenshot displays the RealTimePOS application interface. At the top, it shows 'Store Number: NorthCarolina', 'Employee Name: Md. Qayamuddin', and the time '03:00 PM, 23/08/2019'. The receipt number is '#4587WP56' and the 'Global Discount %' is '0'. A table lists items with columns for 'Item number', 'Description', 'Price', 'Qty', 'Disc %', and 'EXT Price'. The items are 'Megans T Shirt' with a price of '\$ 45.00' and a 30% discount, resulting in an 'EXT Price' of '\$45.00'. A 'Total Discounts: -\$ 15.00' is shown at the bottom left. A 'Tenders' modal is open, showing options for 'Cash', 'Gift Card', and 'Credit Card'. The modal also displays 'Total Balance: \$ 45.00', 'Balance Paid: \$ 45.00', and 'Balance Due: \$ 00.00'. The bottom of the screen shows 'Total Discounts: -\$ 15.00', 'Sub Total: \$ 133.45', 'Tax: \$ 15.00', and 'Total Amount: \$ 133.45'. The interface includes various navigation icons on the right side such as 'Exit Sales', 'Cancel Receipts', 'List Items', 'Remove Items', 'Customer', 'Create Sales Order', 'Apply Coupon', 'Hold Sales', and 'Options'.
