Engagement model

We offers different pricing models to meet global client's diverse needs

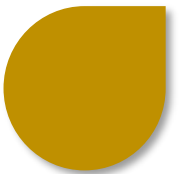

Fixed cost

For fixed scope project, where we'll have wireframe, functional and non functional scope documents

Time & Material

Pay as your go engagement where client has small requirement and no fixed scope

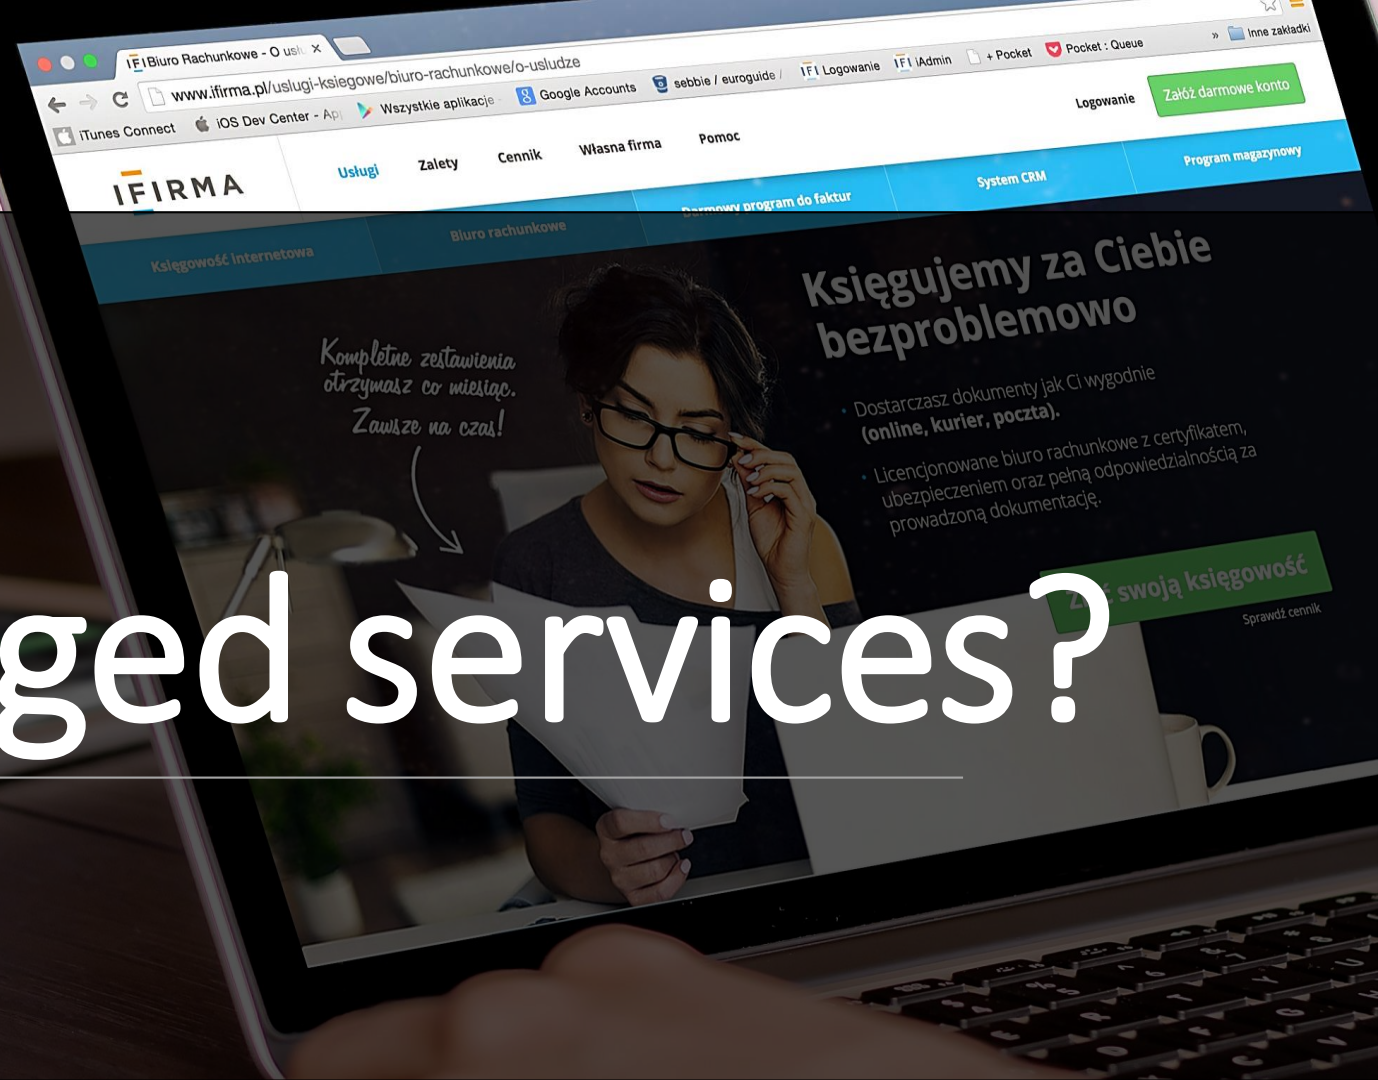

Full time hiring (FTE)

For large and complex projects where clients wants to handle the resources themselves and want to have 1 to 1 communication for project secret & success

Why managed services?

Managed services

The strategic use of outside resources to perform activities traditionally handled by internal staff and resources.

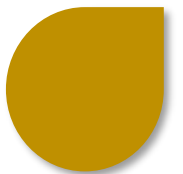

Operating cost

By outsourcing your development jobs, you can reduce and control your operating cost

Focus

You can focus on your business activities while we will take your development jobs.

Internal resources

You can free your internal resources and utilize them on other jobs

World class resource access

You can access world class pool of expert resources

Development cost

When you out source your jobs to us, you can save around 80% of your development cost or developer's salary

Risks

By outsourcing your jobs, actually you are sharing your project risks with us.

Testimonials

The strategic use of outside resources to perform activities traditionally handled by internal staff and resources.

Thank you
